

Step one: Go to the RWW web site - see the pink stuff -

Step two - say okay to trusting the site (that "Continue to this web site" part).

Step three - view the Certificate information

Step four - install the certificate

Steps five through whatever - just follow the wizards.

Welcome to the Certificate Import Wizard

This wizard helps you copy certificates, certificate trust lists, and certificate revocation lists from your disk to a certificate store.

A certificate, which is issued by a certification authority, is a confirmation of your identity and contains information used to protect data or to establish secure network connections. A certificate store is the system area where certificates are kept.
